Professional Summary

Software Engineer with 3+ years of experience building scalable web and mobile applications using Angular, React, React Native, and Node.js. Proven track record in healthcare, logistics, and fintech domains, focusing on performance optimization, responsive UI development, and end-to-end feature delivery in agile environments.

Professional Experience

Software Engineer, Entoss Technologies
March 2025 – Present, Remote

- Built enterprise-grade ERM and multimodal logistics applications, supporting end-to-end transportation workflows across road, rail, sea, and air.
- Developed systems to manage logistic shipments, routing, tracking, documentation, billing, and compliance, enabling seamless coordination between multiple transport modes.
- Designed intuitive and responsive interfaces to support internal operations teams, partners, and external clients, improving visibility and operational efficiency.
- Collaborated closely with product managers and backend engineers to gather requirements, streamline logistics processes, and deliver scalable, reliable solutions.

Angular Developer, HealthOCare Private Limited
June 2023 - February 2025, Hyderabad, Telangana

- Led frontend development of the health care platform, collaborating with backend teams in agile sprints.
- Designed user-friendly UI/UX components for efficient patient and workflow management.
- Developed key modules including patient records, billing, and financial reporting.
- Optimized application performance, improving load times by up to 60%.
- Implemented secure authentication and role-based access control.

Intern Software Engineer, CANACO Technologies
November 2022 - June 2023, Remote

- Built Angular-based project management tools with task tracking, status workflows, and role-based access control.
- Built a Banquet Hall Booking application featuring scheduling, availability management, and end-to-end booking workflows, actively used by multiple clients.
- Collaborated closely with senior developers to implement new features, optimize existing modules, and resolve high-priority production bugs, improving application stability and performance.

Technical Skills

Frontend: Angular, React, React Native, TypeScript, JavaScript, HTML, CSS, SCSS, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, MongoDB, REST APIs
Tools: Git, Jira, Agile/Scrum
Concepts: Responsive Design, API Integration, Performance Optimization, RBAC

Education

Bachelor of Engineering in Electrical and Electronics Engineering — August 2020 - April 2023
Sir C R Reddy College of Engineering, Eluru

Diploma in Electrical and Electronics Engineering — June 2017 - May 2020
Sir C R Reddy Polytechnic College, Eluru

SSC — June 2016 - March 2017
St. Xavier's English Medium High School, Eluru

Key Projects

Next Event — Banquet Hall Management System
React, React Native, Express.js, MongoDB, Node.js
play.google.com/store/apps/details?id=com.nextevent

- Built a full-stack banquet booking system (web + mobile).
- Developed React admin dashboard and React Native app with CRUD and search.
- Designed REST APIs using Node.js and MongoDB.
- Implemented authentication and role-based access control.

MyCargo — International Shipping Booking Platform
Angular, Express.js, Node.js, CouchDB
mycargo.ibpaas.pomfret.cloud/myCargo

- Built a shipper platform for managing bookings, quotations, and international cargo transportation.
- Implemented the application following Digital Container Shipping Association (DCSA) standards for global compatibility.
- Ensured seamless usability across multiple carriers and regulatory environments.

HealthO — Hospital & Lab Management System
Angular, TypeScript, Web API, WebSocket, Bootstrap, SCSS

- Developed an HMS/LMS platform for hospitals, clinics, and laboratories, managing patient records, appointments, reports, and inventory.
- Led Angular frontend development to create responsive, user-friendly interfaces for healthcare workflows.
- Integrated APIs for patient data, billing, and reporting, ensuring secure, role-based access for medical staff.
- Optimized performance with efficient data handling, caching, and asynchronous processing.

OneFreight — Logistics Management Platform
Angular, Express.js, Node.js, CouchDB

- Built a freight forwarding platform for managing bookings, shipment tracking, and payment workflows.
- Developed tools for end-to-end international shipping across road, sea, and container transport.
- Created a responsive Angular frontend optimized for seamless user experience across devices.
- Designed a scalable backend using Express.js to ensure reliable performance and data flow.

Saveiy — Subscription Tracking Application
React, React Native, Express.js, Node.js
saveiy.com

- Implemented consent-based smart-sync technology to detect and categorize recurring payments from user-linked financial accounts, eliminating manual entry.
- Integrated Account Aggregator (AA) framework–compliant APIs along with SMS and email parsing to identify and classify transaction patterns in near real time, in alignment with Sahamati / FinVu data-sharing standards.
- Designed the application UI and developed the mobile app using React Native, with Express.js powering backend services.

Word Sprint — Typing Practice Application
React, JavaScript, CSS
word-sprint.netlify.app

- Developed an interactive web app to help users improve typing speed and accuracy through gamified practice.
- Provided tools to customize their practice experience.
- Built a real-time feedback system calculating WPM and accuracy with immediate visual updates.
- Implemented customizable practice sessions with configurable time limits, word targets, and difficulty levels.

Lnq — URL Shortner Application
React, Express.js, Node.js, MongoDB, JavaScript
lnq.up.railway.app

- Built a URL shortener to convert long links into compact, shareable URLs with basic analytics.
- Developed a full-stack application ensuring fast redirection and efficient link management.
- Implemented user authentication and URL management features.
